

MOTORISED AERATOR & CORER

SKU: **PMLAGX160**

Combine the reliability of a genuine Honda GX160 engine with the toughest engineering specifications and you have Australia's best motorised lawn corer. Designed and built for Australian conditions this lawn corer and aerator is top quality and best in its class. Paddock™'s innovative design allows the unit to be used as a lawn corer or spike aerator by changing over the tines. Both coring and spike aerating tines are provided and replacements are affordable and easily ordered. Being self propelled you can aerate your lawns with ease in summer and winter.

PADDOCK™ LAWN CORER & AERATOR

- Self propelled!
- Dual function - coring & spike aerating
- Genuine Honda GX160 Engine
- Cam driven tines deliver stable operation
- Heavy duty trade quality construction
- Reliable and simple pull start
- Heavy duty coring and aerating tines included
- Simple to service and maintain

The Paddock™ dual lawn corer and spike aerator is a versatile machine. Popular with DIY & home gardeners through to professional landscapers. Being self propelled and incorporating a high powered Honda engine gives the aerator a high working efficiency. You'll easily aerate substantial areas with ease. Great for home gardens and lawns right through to small acreages. Maintenance is simple and can be performed by most handy individuals. If that's not your cup of tea then the aerators can be serviced and maintained at any mower shop. The two year warranty through Paddock™ will give you peace of mind. However if parts are ever required we stock a full range. Honda GX160's are a popular engine and parts & service can be sourced easily.

Paddock™ has designed and built the aerator for Australian conditions and with the user in mind. Soft tine engagement through a single hand operated lever on the handle gives a smooth operation. With four independent wheels the aerator is easy to maneuver and turn. To improve penetration depths additional weights have been implemented at just the right places to give the correct center of gravity for maximum tine efficiency. Steer clear of water weighted machines as the weight distribution moves as the water moves and the weight is often insufficient. The Paddock™ quick fold handles make storage and transport a breeze. For those loading the machine onto utes or trailers the machine comes with load rated lifting points and tie down points.

Aerating your lawn or soil offers many advantages including:

- reducing soil compaction
- reducing thatch
- increased access to the grass roots for moisture, air, fertiliser, food
- easy plantation of seeds into the soil depths
- increased seed germination

- reduced weeds

Lawn Aerator	PMLAGX160
Brand	Paddock™ Machinery
Aerating Width	410mm
Coring depth	70mm
Core Spacings	95mm center to center
Working Efficiency	2500 m ² / hour
No. of Tines	4
Tine Size	Coring Tines (22mm OD x 100mm). Spike Tines (12mm x 100mm)
Drive	Belt driven
Max. Operating Slope	20 degrees
Sound Levels	95 dB(a)
Engine	4-stroke single cylinder OHV petrol engine. 25° inclined cylinder. Horizontal shaft.
Power	3.6kW (4.8HP) at 3,600 rpm
Start	Pull Start
Fuel Tank Capacity	3.1L
Wheels	Puncture proof

Construction	Heavy duty, powdercoated steel
Features	Lifting & tie-down points. Proprietary soft tine engagement. Quick fold handles.
Includes	4x coring tines. 4x spike tines.
Weight	115kg
Warranty	2 Year (Includes engine and machine)
